

Grace Goudreau

Product Designer

Chicago, IL · (331) 222-6175 · goudreaugrace@gmail.com · [GraceGoudreau.com](https://gracegoudreau.com)

SUMMARY

Product designer specializing in complex enterprise tools, where I turn ambiguity into clear, usable, high-craft experiences. I own the full end to end process, discovery, problem framing, high-fidelity design, and production-ready prototypes, and move work forward by aligning product, engineering, and business partners around a shared direction. I'm a strong cross-functional partner and systems thinker, with an AI-native toolkit that lets me prototype, test, and iterate quickly.

EXPERIENCE

Senior UX Designer — PepsiCo Apr 2026 – Present

- **Owned UX strategy, vision, and research for an AI negotiation-support tool** used by a high-stakes commercial team, turning fragmented data and unadopted AI agents into a trust-first, evidence-backed decision experience and a validated prototype plan.
- **Lead UX designer for a supply-chain forecasting & AI scenario-modeling product** (CTX suite), driving major releases end-to-end. From user research and problem framing through high-fidelity UI, prototyping, and user testing.
- **Turned dense, ambiguous supply-chain data into decision-ready workflows** for non-technical planners — partnering with product, engineering, and business stakeholders to resolve tradeoffs and align on direction in a complex domain.
- **Championed an AI-driven design-to-build model** that repositions design from downstream execution to upstream product decision-making, defining a continuous research-to-ship learning loop, what AI enables end to end, prototyping using AI tools for faster ideation and concept testing,

UX Designer — PepsiCo Jul 2024 – Apr 2026

- **Designer on an internal order-monitoring tool** spanning the full order lifecycle from intake to SAP confirmation — now in global rollout to Poland, DACH, France, the UK, and NWE markets.
- **Redesigned a fragmented, multi-system process** into a single guided workflow with real-time order visibility, giving ops teams a clear line of sight across the order lifecycle and speeding end-to-end processing.
- **Partnered with product owners, engineers, and business stakeholders** to translate complex operational requirements into a clear, scalable end-to-end experience.

Product Design Intern — West Monroe May 2023 – Aug 2023

- Translated user needs, client goals, and technical constraints into scalable design solutions across multiple client engagements.

PROJECTS & LEADERSHIP

- **AI-Native Design Proof-of-Concept (Figma Make).** Built and publicly shared an end-to-end POC demonstrating the AI-first design workflow — a working argument for designing experiences over screens.
- **AI workflow enablement.** Delivered multiple presentations to UX designers and developers on integrating AI into team workflows — showing how AI-assisted design and build accelerate iteration, reduce design-to-development friction, and help teams work more efficiently.
- **Thought leadership.** Ongoing LinkedIn writing on the “Design Thinking Era,” documenting firsthand AI workflow experiments and the shift toward designing experiences over screens.

SKILLS

Design Product Design, UX Strategy, AI Interaction Design, Design Systems, User Research, Information Architecture, AI Prototyping

AI & Build Figma Make, Figma MCP / Dev Mode, Cursor, Codex, Claude Code, Claude Cowork

Collaboration Stakeholder Alignment, Cross-Functional Partnership, Engineering Enablement

EDUCATION

Purdue University — B.S. in UX Design · GPA 3.55 Aug 2020 – May 2024
